GLOSSARY OF TERMS AND ABBREVIATIONS AND ACCOUNTING STANDARDS

The following terms and abbreviations and accounting standards appear in the text of this report and have the definitions described below:

	and all supplies in the text of this report and nave the definitions described below.
AFUDC	Allowance for Funds Used During Construction
AOCI	Accumulated Other Comprehensive Income (Loss)
Aquila	Aquila, Inc.
ASC	Accounting Standards Codification
ASC 820	ASC 820, "Fair Value Measurements and Disclosures"
Bbl	Barrel
Bcf	Billion cubic feet
Bcfe	Billion cubic feet equivalent
BHC	Black Hills Corporation
BHCRPP	Black Hills Corporation Risk Policies and Procedures
BHEP	Black Hills Exploration and Production, Inc., representing our Oil and Gas segment, a direct, wholly-owned subsidiary of Black Hills Non-regulated Holdings
Black Hills Electric Generation	Black Hills Electric Generation, LLC, representing our Power Generation segment, a direct wholly-owned subsidiary of Black Hills Non-regulated Holdings
Black Hills Energy	The name used to conduct the business activities of Black Hills Utility Holdings
Black Hills Non-regulated Holdings	Black Hills Non-regulated Holdings, LLC, a direct, wholly-owned subsidiary of the Company that was formerly known as Black Hills Energy, Inc.
Black Hills Power	Black Hills Power, Inc., a direct, wholly-owned subsidiary of the Company
Black Hills Service Company	Black Hills Service Company, a direct wholly-owned subsidiary of the Company
Black Hills Utility Holdings	Black Hills Utility Holdings, Inc., a direct, wholly-owned subsidiary of the Company
Black Hills Wyoming	Black Hills Wyoming, LLC, a direct, wholly-owned subsidiary of Black Hills Electric Generation
Btu	British thermal unit
CFTC	Commodities Futures and Trading Commission
Cheyenne Light	Cheyenne Light, Fuel and Power Company, a direct, wholly-owned subsidiary of the Company
Colorado Electric	Black Hills Colorado Electric Utility Company, LP, (doing business as Black Hills Energy), an indirect, wholly-owned subsidiary of Black Hills Utility Holdings
Colorado Gas	Black Hills Colorado Gas Utility Company, LP, (doing business as Black Hills Energy), an indirect, wholly-owned subsidiary of Black Hills Utility Holdings
Colorado IPP	Black Hills Colorado IPP, a direct wholly-owned subsidiary of Black Hills Electric Generation
CPCN	Certificate of Public Convenience and Necessity
CPUC	Colorado Public Utilities Commission
De-designated interest rate swaps	The \$250.0 million notional amount interest rate swaps that were originally designated as cash flow hedges under accounting for derivatives and hedges but subsequently de-designated in December 2008
Dodd-Frank	Dodd-Frank Wall Street Reform and Consumer Protection Act

Dth	Dekatherm. A unit of energy equal to 10 therms or one million British thermal units (MMBtu)
Enserco	Enserco Energy Inc., representing our Energy Marketing segment, a direct, wholly-owned subsidiary of Black Hills Non-regulated Holdings
FASB	Financial Accounting Standards Board
FERC	Federal Energy Regulatory Commission
Forward Agreement	Equity Forward Agreement with J. P. Morgan connected to a public offering of 4,000,000 million shares of Black Hills Corporation common stock
GAAP	Generally Accepted Accounting Principles
Global Settlement	Global settlement with the utilities commission where the dollar figure is agreed upon, but the specific adjustments used by each party to arrive at the figure are not specified in public rate orders
Iowa Gas	Black Hills Iowa Gas Utility Company, LLC, (doing business as Black Hills Energy), a direct, wholly-owned subsidiary of Black Hills Utility Holdings
IPP	Independent Power Producer
IRS	Internal Revenue Service
IUB	Iowa Utilities Board
Kansas Gas	Black Hills Kansas Gas Utility Company, LLC, (doing business as Black Hills Energy), a direct, wholly-owned subsidiary of Black Hills Utility Holdings
LIBOR	London Interbank Offered Rate
LOE	Lease Operating Expense
Mcf	One thousand standard cubic feet
Mcfe	One thousand standard cubic feet equivalent
MDU	MDU Resources Group, Inc.
MEAN	Municipal Energy Agency of Nebraska
MMBtu	One million British thermal units
MSHA	Mine Safety and Health Administration
MW	Megawatt
MWh	Megawatt-hour
Nebraska Gas	Black Hills Nebraska Gas Utility Company, LLC, (doing business as Black Hills Energy), a direct, wholly-owned subsidiary of Black Hills Utility Holdings
NPSC	Nebraska Public Service Commission
NYMEX	New York Mercantile Exchange
OCA	Office of Consumer Advocate
PGA	Purchase Gas Adjustment
PPA	Power Purchase Agreement
PPACA	Patient Protection and Affordability Care Act
PSCo	Public Service Company of Colorado
Revolving Credit Facility	Our \$500 million three-year revolving credit facility which commenced on April 15, 2010 and expires on April 14, 2013
SDPUC	South Dakota Public Utilities Commission
SEC	United States Securities and Exchange Commission
WPSC	Wyoming Public Service Commission
WRDC	Wyodak Resources Development Corp., a direct, wholly-owned subsidiary of Black Hills Non-regulated Holdings

BLACK HILLS CORPORATION

Notes to Condensed Consolidated Financial Statements (unaudited) (Reference is made to Notes to Consolidated Financial Statements included in the Company's 2010 Annual Report on Form 10-K)

(1) MANAGEMENT'S STATEMENT

The condensed consolidated financial statements included herein have been prepared by Black Hills Corporation (the "Company," "us," "we," or "our") without audit, pursuant to the rules and regulations of the SEC. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted pursuant to such rules and regulations; however, we believe that the footnotes adequately disclose the information presented. These condensed quarterly financial statements should be read in conjunction with the financial statements and the notes thereto, included in our 2010 Annual Report on Form 10-K filed with the SEC.

Accounting methods historically employed require certain estimates as of interim dates. The information furnished in the accompanying condensed quarterly financial statements reflects all adjustments, including accruals, which are, in the opinion of management, necessary for a fair presentation of the March 31, 2011, December 31, 2010 and March 31, 2010 financial information and are of a normal recurring nature. Certain industries in which we operate are highly seasonal and revenues from, and certain expenses for, such operations may fluctuate significantly among quarterly periods. Demand for electricity and natural gas is sensitive to seasonal cooling, heating and industrial load requirements, as well as changes in market price. In particular, the normal peak usage season for gas utilities is November through March and significant earnings variances can be expected between the Gas Utilities segment's peak and off-peak seasons. Due to this seasonal nutre, our results of operations and financial condition as of March 31, 2011, December 31, 2010 are not necessarily indicative of the results of operations and financial condition to be expected as of or for any other period. All earnings per share amounts discussed refer to diluted earnings per share unless otherwise noted.

Certain prior year data presented in the financial statements have been reclassified to conform to the current year presentation. Specifically, (a) the Company has reclassified revenue into two categories: utilities revenue and non-regulated revenues, (b) the categories of Fuel, purchased power and cost of gas sales and Operations and maintenance included in our Operating expenses have also been reclassified into utilities and non-regulated, and (c) the Taxes - property, production and severance line has been reclassified to show only those taxes. Any taxes other than income are now included in the respective utility or non-regulated operations and maintenance lines. These reclassifications had no effect on total assets, net income, cash flows or earnings per share.

Restatement - Subsequent to the issuance of the Company's 2010 financial statements, the Company's management determined that certain intercompany transactions with our rate regulated operations had not been properly eliminated in consolidation, resulting in an overstatement of Utility and Non-regulated revenue and Fuel, purchased power and cost of gas sold of \$15.8 million, in aggregate for the three months ended March 31, 2010, respectively. As such, the condensed consolidated financial statements have been restated for the correction of this error. The error did not have an impact on our gross margin, net income, total assets or cash flows.

(2) RECENTLY ADOPTED AND RECENTLY ISSUED ACCOUNTING STANDARDS AND LEGISLATION

Recently Adopted Accounting Standards

Fair Value Measurements, ASC 820

In January 2010, the FASB issued guidance related to improving disclosures about fair value measurements. The guidance requires separate disclosures of the amounts of transfers in and out of Level 1 and Level 2 fair value measurements, disclosure of inputs and techniques used in valuation and a description of the reason for such transfers. In the reconciliation for Level 3 fair value measurements using significant unobservable inputs, information about purchases, sales, issuances and settlements are required to be presented separately. These disclosures are required for interim and annual reporting periods and were effective for us on January 1, 2010, except for the disclosures related to the purchases, sales, issuances and settlements in the roll forward activity of Level 3 fair value measurements, which were effective on January 1, 2011. The guidance requires additional disclosures, but did not impact our financial position, results of operations or cash flows. The additional disclosures are included in Note 13.

Recently Issued Accounting Standards and Legislation

Patient Protection and Affordable Care Act

In March 2010, the President of the United States signed into law comprehensive healthcare reform legislation under the PPACA as amended by the Healthcare and Education Reconciliation Act. The potential impact on the Company, if any, cannot be determined until regulations are promulgated under the PPACA. Included among the provisions of the PPACA is a change in the tax treatment of the Medicare Part D subsidy (the "subsidy") which affects our Non-Pension Postretirement Benefit Plan. Internal Revenue Code Section 139A has been amended to eliminate the deduction of the subsidy in reducing income for years beginning after December 31, 2012. The impact of this change in the tax treatment of the subsidy had an immaterial effect on our financial position, results of operations and cash flows. The Company will continue to assess the accounting implications of the PPACA as related regulations and interpretations become available.

Dodd-Frank Wall Street Reform and Consumer Protection Act

In July 2010, the President of the United States signed into law comprehensive financial reform legislation under Dodd-Frank. Title VII of Dodd-Frank effectively regulates many derivative transactions in the United States that were previously unregulated, including swap transactions in the over-the-counter market. Among other things, Dodd-Frank (i) mandates the clearing of some swaps through regulated central clearing organizations and the trading of clearing swaps through regulated exchanges or swap execution facilities, in each case subject to certain key exemptions, and (ii) authorizes regulators to establish collateral and margin requirements for certain swap transactions that are not cleared. Dodd-Frank provides for a potential exception from these clearing and cash collateral requirements for commercial end-users, potentially including utilities, and it includes a number of defined terms that will be used in determining how this exception applies to particular derivative transactions and the parties to those transactions. Significant rule-making by numerous governmental agencies, particularly the CFTC with respect to non-security commodities, will be required over the next several months to implement the restrictions, limitations, and requirements contemplated by Dodd-Frank, and we will continue to evaluate the impact as these rules become available.

(3) SUPPLEMENTAL DISCLOSURE OF CASH FLOW INFORMATION

		Three Months Ended			
	Marc 20	h 31,)11		March 31, 2010

Gas and oil held by Energy Marketing*	23,494		76,550		45,015
Total materials, supplies and fuel	\$ 69,341	\$	139,677	\$	91,111

* As of March 31, 2011, December 31, 2010 and March 31, 2010, market adjustments related to natural gas held by Energy Marketing and recorded in inventory as part of fair value hedge transactions were \$0.3 million, \$(9.1) million and \$(11.0) million, respectively (see Note 12 for further discussion of Energy Marketing trading activities).

(5) ACCOUNTS RECEIVABLE

Trade Accounts Receivable

Our Accounts receivable represents primarily customer trade accounts at our Electric Utilities, Gas Utilities and counterparty trade accounts at our Energy Marketing segment. This balance fluctuates primarily due to the seasonality of our Gas Utilities and commodity prices at our Energy Marketing segment. We maintain an allowance for doubtful accounts which reflects our best estimate of potentially uncollectible trade accounts receivables. We regularly review our trade receivable allowances by considering such factors as historical experience, credit-worthiness, the age of the accounts receivable balances and current economic conditions that may affect our ability to collect.

Following is a summary of receivables (in thousands):

March 31, 2011	Accounts eivable, Trade	Unbilled Revenues	Total Accounts Receivable	Less Allowance for Doubtful Accounts	Accounts Receivable, net
Electric	\$ 46,077	\$ 16,196	\$ 62,273	\$ (728)	\$ 61,545

Income Tax Receivable

Income tax receivable is primarily comprised of the refund (including an estimate of after-tax interest income) to be received as a result of the settlement reached with IRS in mid-2010 and finalized in early 2011 and estimated payments made at the federal, state, and foreign levels. With respect to the estimated payments, they relate to multiple prior tax years and were included in taxes payable at both March 31, 2010 and December 31, 2010.

(6) NOTES PAYABLE

Our credit facilities and debt securities contain certain restrictive covenants including, among others, recourse leverage ratios and consolidated net worth covenants. As of March 31, 2011, we were in compliance with these covenants. None of our facilities or debt securities contain default provisions pertaining to our credit ratings.

Revolving Credit Facility

In April 2010, we entered into a new \$500.0 million Revolving Credit Facility expiring April 14, 2013. The facility contains an accordion feature which allows us to, with the consent of the administrative agent, increase the capacity of the facility to \$600.0 million. This facility can be used for the issuance of letters of credit, to fund working capital needs and for other corporate purposes. Borrowings are available under a base rate option or a Eurodollar option. The cost of borrowings or letters of credit is determined based upon our credit ratings. At current ratings levels, the margins for base rate borrowings, Eurodollar borrowings and letters of credit are 1.75%, 2.75% and 2.75%, respectively at March 31, 2011. The facility contains a commitment fee to be charged on the unused amount of the facility. Based upon current credit ratings, the fee is 0.5%.

Deferred financing costs of \$4.7 million are being amortized over the term of the facility and the amortization expense is included in Interest expense on the accompanying Condensed Consolidated Statements of Income as follows (in thousands):

	2011		2010
Amortization Expense	\$	473 \$	_

The Revolving Credit Facility includes the following covenants that we must comply with at the end of each quarter (dollars, in thousands). We were in compliance with these covenants as of March 31, 2011.

	Actual		Coven	ant Requirement
Consolidated Net Worth	\$ 5	1,113	\$	873
Recourse leverage ratio		57.8%		65.0%

Enserco Credit Facility

In May 2010, Enserco entered into an agreement for a two-year \$250.0 million committed credit facility. The facility contains an accordion feature which allows Enserco, with the consent of the administrative agent, to increase commitments under the facility to \$350.0 million. Maximum borrowings under the facility are subject to a sub-limit of \$50 million. Borrowings under this facility are available under a base rate option or a Eurodollar option. Margins for base rate borrowings are 1.75% and for Eurodollar borrowings are 2.50%. The facility covenants include tangible net worth, net working capital and realized net working capital requirements. Enserco was in compliance with the covenants of this facility as of March 31, 2011.

At March 31, 2011, \$147.1 million of letters of credit were issued and outstanding under this facility and there were no cash borrowings outstanding.

Deferred financing costs of \$2.1 million were recorded for the Enserco Credit Facility and are being amortized over the term of the facility. Amortization of deferred financing costs included in Interest expense on the accompanying Condensed Consolidated Statements of Income was as follows (in thousands):

	Three Months Ended March 31,			
	2011	2010		
Amortization expense	\$ 2	68 \$	533	

Corporate Term Loan

In December 2010, we entered into a one-year \$100.0 million term loan (the "Loan") with J.P. Morgan and Union Bank due in December 2011. The cost of borrowing under the Loan was based on a spread of 137.5 basis points over LIBOR (1.69% at March 31, 2011). The covenants are substantially the same as those which are included in the Revolving Credit Facility. We were in compliance with these covenants as of March 31, 2011.

(7) EARNINGS PER SHARE

Basic earnings per share are computed by dividing net income by the weighted-average number of common shares outstanding during the period. Diluted earnings per share are computed by using all dilutive common shares potentially outstanding during a period. A reconciliation of Net income and basic and diluted share amounts, used to compute earnings per share, is as follows (in thousands, except per share amounts):

Period Ended March 31, 2011	Three Months				
	1	ncome	Average Shares		
Net income	\$	26,910	39,059		
Dilutive effect of:					
Restricted stock		—	132		
Options		—	17		
Forward Equity Issuance		—	460		
Other		—	93		
Diluted earnings	\$	26,910	39,761		
Diluted earnings per share	\$	0.68			

Period Ended March 31, 2010	Three Months					
	I	Income				
Net income	\$	31,434	38,848			
Dilutive effect of:						
Restricted stock		_	89			
Options		—	—			
Other		—	72			
Diluted earnings	\$	31,434	39,009			
Diluted earnings per share	\$	0.81				

The following outstanding securities were not included in the computation of diluted earnings per share as their effect would have been anti-dilutive (in thousands):

	Three Months Ended March 31,		
	2011	2010	
Options to purchase common stock	83	264	
Restricted stock	7		
	90	264	

(8) COMPREHENSIVE INCOME (LOSS)

The following table presents the components of our other comprehensive income (loss) (in thousands):

	Three Months End	ed March 31	, 2011
Net income		\$	26,910
Other comprehensive income (loss), net of tax:			
Fair value adjustment on derivatives designated as cash flow hedges	\$ (3,785)		
Taxes	1,637		
Fair value adjustment on derivatives designated as cash flow hedges, net of tax	 		(2,148)
Reclassification adjustments on cash flow hedges settled and included in net income (loss)	\$ 861		
Taxes	(292)		
Reclassification adjustments on cash flow hedges settled and included in net income (loss), net of tax			569
Comprehensive income		\$	25,331
		-	

	-	Three Months Ended March 3	1, 2010
Net income		\$	31,434
Other comprehensive income (loss), net of tax:			
Minimum pension liability adjustments	\$	19	
Taxes		(7)	
Minimum pension liability adjustments, net of tax			12
Fair value adjustment on derivatives designated as cash flow hedges	\$	2,007	
Taxes		(591)	
Fair value adjustment on derivatives designated as cash flow hedges, net of tax			1,416
Reclassification adjustments on cash flow hedges settled and included in net income (loss)	\$	2,938	
Taxes		(1,061)	
Reclassification adjustments on cash flow hedges settled and included in net income (loss), net of tax			1,877
Comprehensive income		\$	34,739

Balances by classification included within Accumulated other comprehensive loss on the accompanying Condensed Consolidated Balance Sheets are as follows (in thousands):

March 31, 2011		December 31, 2010	March 31, 2010
\$	(14,016) \$	(12,437) \$	(6,182)
	(11,142)	(11,142)	(9,624)

\$	(25,160) \$	(23,581) \$	(15,859)
	\$	2011 \$ (14,016) \$ (11,142) (2)	2011 2010 \$ (14,016) \$ (12,437) \$ (11,142) (11,142) (11,142) (11,142) (2) (2)

(9) COMMON STOCK

Other than the following transactions, we had no material changes in our common stock during the first three months of 2011 from the amount reported in Note 11 of the Notes to Consolidated Financial Statements in our 2010 Annual Report on Form 10-K.

Equity Compensation Plans

- We granted 67,389 target performance shares to certain officers and business unit leaders for the January 1, 2011 through December 31, 2013 performance period. Actual shares are not issued until the end of the performance plan period (December 31, 2013). Performance shares are awarded based on our total stockholder return over the designated performance period as measured against a selected peer group and can range from 0% to 175% of target. In addition, certain stock price performance must be achieved for a payout to occur. The final value of the performance shares will vary according to the number of shares of common stock that are ultimately granted based upon the actual level of attainment of the performance criteria. The performance awards are paid 50% in the form of cash and 50% in shares of common stock. The grant date fair value was \$25.91 per share.
- We issued 14,111 shares of common stock under the 2010 short-term incentive compensation plan during the three months ended March 31, 2011. Pre-tax compensation cost related to the awards was approximately \$0.4 million, which was accrued for in 2010.

- We granted 125,963 restricted common shares during the three months ended March 31, 2011. The pre-tax compensation cost related to the awards of restricted stock and restricted stock units
 of approximately \$3.8 million will be recognized over the three-year vesting period.
- 2,500 stock options were exercised during the three months ended March 31, 2011 at a weighted-average exercise price of \$30.81 per share which provided \$0.1 million of proceeds.

Total compensation expense recognized for all equity compensation plans for the three months ended March 31, 2011 and 2010 was \$2.4 million and \$1.8 million, respectively.

As of March 31, 2011, total unrecognized compensation expense related to non-vested stock awards was \$11.0 million and is expected to be recognized over a weighted-average period of 2.2 years.

Dividend Reinvestment and Stock Purchase Plan

We have a Dividend Reinvestment and Stock Purchase Plan ("DRIP") under which stockholders may purchase additional shares of common stock through dividend reinvestment and/or optional cash payments at 100% of the recent average market price. We have the option of issuing new shares or purchasing the shares on the open market. We issued 25,026 new shares at a weighted-average price of \$31.07 during the three months ended March 31, 2011. At March 31, 2011, 164,667 shares of unissued common stock were available for future offering under the DRIP Plan.

Dividend Restrictions

Our Revolving Credit Facility contains restrictions on the payment of cash dividends upon a default or event of default. An event of default would be deemed to have occurred if we did not meet certain financial covenants. The most restrictive financial covenants include the following: a recourse leverage ratio not to exceed 0.65 to 1.00 and a minimum consolidated net worth of \$625 million plus 50% of aggregate consolidated net income, if positive, since January 1, 2005. As of March 31, 2011, we were in compliance with the above covenants.

Due to our holding company structure, substantially all of our operating cash flows are provided by dividends paid or distributions made by our subsidiaries. The cash to pay dividends to our shareholders is derived from these cash flows. As a result, certain statutory limitations or regulatory or financing agreements could affect the levels of distributions allowed to be made by our subsidiaries. The following restrictions on distributions from our subsidiaries existed as of March 31, 2011:

- Our utility subsidiaries are generally limited to the amount of dividends allowed by state regulatory authorities to be paid to us as a utility holding company and also may be subject to further restrictions under the Federal Power Act. As of March 31, 2011, the restricted net assets at our Utilities Group were approximately \$193.7 million.
- Our Enserco Credit Facility is a borrowing base credit facility, the structure of which requires certain levels of tangible net worth and net working capital to be maintained for a given borrowing base election level. In order to maintain a borrowing base election level, Enserco may be restricted from making dividend payments to its parent company. Enserco's restricted net assets at March 31, 2011 were \$86.2 million.
- Pursuant to a covenant in the Black Hills Wyoming project financing, Black Hills Non-regulated Holdings has restricted assets of \$100.0 million. Black Hills Non-regulated Holdings is the parent of Black Hills Electric Generation which is the parent of Black Hills Wyoming.

Forward Equity Issuance

In November 2010, we entered into a Forward Agreement with J.P. Morgan in connection with a public offering of 4,000,000 shares of Black Hills Corporation common stock. Under the Forward Agreement on November 10, 2010, we agreed to issue to J.P. Morgan 4,000,000 shares of our common stock at an initial forward price of \$28.70875 per share. On December 7, 2010, the underwriters exercised the over-allotment option to purchase an additional 413,519 shares under the same terms as the original Forward Agreement (together with the Forward Agreement, the "Forward Agreements").

Based on the closing Black Hills Corporation common stock price of \$33.44 on March 31, 2011, and the forward price on the date for the initial equity forward of \$27.95 and over-allotment shares of \$27.95, the fair value net cash settlement of the 4,000,000 equity forward instrument and 413,519 over-allotment shares was approximately \$24.2 million. The Forward Agreements require a 60-day notice prior to settlement for cash or net share settlements. Forward prices and volume-weighted average market prices for the period between when notice is provided and settlement are used to calculate cash and net share settlement amounts.

We may settle the equity forward instrument at any time up to the maturity date of November 10, 2011. We may also unilaterally elect to cash or net share settle on any date up to maturity, for all or a portion of the equity forward shares. It is our intent to settle the equity forward with the physical delivery of shares in the fourth quarter of 2011.

At March 31, 2011, the equity forward instrument could have been settled with physical delivery of 4,413,519 shares to J.P. Morgan in exchange for cash of \$123.4 million. Assuming required notices were given and actions taken, the forward instruments could have also been net settled at March 31, 2011 with delivery of cash of approximately \$23.5 million or approximately 706,000 shares of common stock to J.P. Morgan.

(10) EMPLOYEE BENEFIT PLANS

Defined Benefit Pension Plans

We have three non-contributory defined benefit pension plans (the "Pension Plans"). One Pension Plan covers certain eligible employees of the following subsidiaries: Black Hills Service Company, Black Hills Power, WRDC and BHEP; one Pension Plan covers certain eligible employees of our subsidiary, Cheyenne Light, and the remaining Pension Plan covers certain eligible employees of Black Hills Energy. The Pension Plan benefits are based on years of service and compensation levels.

The components of net periodic benefit cost for the three Plans were as follows (in thousands):

Three Months Ended March 31,				
	2010			
55	\$	1,533		
32		3,773		
39)		(3,623)		
25		305		
35		500		
08	\$	2,488		
3		2010 355 \$ 322 339) 25 335 		

Non-pension Defined Benefit Postretirement Healthcare Plans

We sponsor three retiree healthcare plans (the "Healthcare Plans"): the Black Hills Corporation Postretirement Healthcare Plan, the Healthcare Plan for Retirees of Cheyenne Light, and the Black Hills Energy Postretirement Healthcare Plan. Employees who participate in the Healthcare Plans and who retire on or after meeting certain eligibility requirements are entitled to postretirement healthcare benefits.

The components of net periodic benefit cost for the Healthcare Plans were as follows (in thousands):

		March 31,	
	2	2011	2010
Service cost	\$	375 \$	377
Interest cost		542	611
Expected return on plan assets		(41)	(52)
Prior service cost (benefit)		(120)	(77)
Net loss (gain)		169	159
Net periodic benefit cost	\$	925 \$	1,018

It has been determined that our post-65 retiree drug prescription plans are actuarially equivalent and qualify for the Medicare Part D subsidy.

Supplemental Non-qualified Defined Benefit Plans

Additionally, we have various supplemental retirement plans for key executives (the "Supplemental Plans"). The Supplemental Plans are non-qualified defined benefit plans.

The components of net periodic benefit cost for the Supplemental Plans were as follows (in thousands):

	Three Months Ended March 31,					
	2011		2010			
Service cost	\$ 2	57 \$	171			
Interest cost	3:	24	321			
Prior service cost		1	1			
Net loss	12	27	71			
Net periodic benefit cost	\$ 70)9 \$	564			

Contributions

We anticipate that we will make contributions to each of the benefit plans during 2011 and 2012. Contributions to the Healthcare Plans and the Supplemental Plans are expected to be made in the form of benefit payments. Contributions are as follows (in thousands):

	Cor	tributions Made	Anticipated		Anticipated
	Three Mo	nths Ended March 31,			
		2011	Contributions Remaining for 2011	Co	ontributions for 2012
Defined Benefit Pension Plans	\$	—	\$ 550) \$	13,431
Non-Pension Defined Benefit Postretirement Healthcare Plans	\$	882	\$ 2,64	7\$	3,765
Supplemental Non-Qualified Defined Benefit Plans	\$	235	\$ 702	7 \$	896

(11) SUMMARY OF INFORMATION RELATING TO SEGMENTS OF OUR BUSINESS

Our reportable segments are based on our method of internal reporting, which generally segregates the strategic business groups due to differences in products, services and regulation. As of March 31, 2011, substantially all of our operations and assets were located within the United States.

We conduct our operations through the following six reportable segments:

Utilities Group —

- Electric Utilities, which supply electric utility service to areas in South Dakota, Wyoming, Colorado and Montana and natural gas utility service to Cheyenne, Wyoming and vicinity; and
- Gas Utilities, which supply natural gas utility service in Colorado, Iowa, Kansas and Nebraska.

Non-regulated Energy Group —

- Oil and Gas, which produces, explores and operates oil and natural gas interests located in the Rocky Mountain region and other states;
- Power Generation, which produces and sells power and capacity to wholesale customers from power plants located in Wyoming. Additionally, in 2009 our Power Generation segment entered into a 20-year PPA to supply Colorado Electric with 200 MW of capacity and energy from power plants under construction in Colorado, which are expected to be placed into service by December 31, 2011. In January 2011, we sold our ownership interest in the partnership which owned the Idaho facilities;
- · Coal Mining, which engages in the mining and sale of coal from our mine near Gillette, Wyoming; and
- Energy Marketing, which provides natural gas, crude oil, coal, power and environmental marketing and related services in the United States and Canada.

Segment information follows the accounting policies described in Note 1 of the Notes to Consolidated Financial Statements in our 2010 Annual Report on Form 10-K.

Segment information included in the accompanying Condensed Consolidated Statements of Income and Balance Sheets was as follows (in thousands):

Three Months Ended March 31, 2011	011		Intercompany Operating Revenues			Net Income (Loss)

Net income (loss) includes a \$3.6 million net after-tax mark-to-market gain on interest rate swaps for the three months ended March 31, 2011 and a \$2.0 million net after-tax mark-to-market loss on these same interest (a) rate swaps for the three months ended March 31, 2010.

(b) (c)

Total Revenues have been restated to reflect elimination of intercompany activities previously not eliminated. See Note 1 for further discussion. Net income (loss) includes a \$1.7 million after-tax gain on the sale of operating assets as a result of annexation proceedings by the City of Omaha, Nebraska.

(12) RISK MANAGEMENT ACTIVITIES

Our activities in the regulated and non-regulated energy sector expose us to a number of risks in the normal operation of our businesses. Depending on the activity, we are exposed to varying degrees of market risk and counterparty risk. We have developed policies, processes, systems, and controls to manage and mitigate these risks.

Market risk is the potential loss that might occur as a result of an adverse change in market price or rate. We are exposed to the following market risks:

- Commodity price risk associated with our marketing businesses, our natural long position with crude oil, natural gas and coal reserves and production, fuel procurement for certain of our gas-. fired generation assets and variability in revenue due to changes in gas usage at our Gas Utilities segment and from commodity price changes;
- Interest rate risk associated with variable rate credit facilities and changes in forward interest rates used to determine the mark-to-market adjustment on our interest rate swaps; and •
- Foreign currency exchange risk associated with marketing transactions in Canadian dollars.

Our exposure to these market risks is affected by a number of factors including the size, duration, and composition of our energy portfolio, the absolute and relative levels of interest rates, currency exchange rates and commodity prices, the volatility of these prices and rates, and the liquidity of the related interest rate and commodity markets.

We actively manage our exposure to certain market risks as described in Note 3 of the Notes to our Consolidated Financial Statements in our 2010 Annual Report on Form 10-K. Our derivative and hedging activities included in the accompanying Condensed Consolidated Balance Sheets and Condensed Consolidated Statements of Income are detailed in this Note along with Note 13.

Trading Activities

Energy Marketing

We have a natural gas, crude oil, coal, power and environmental marketing business specializing in producer services, end-use origination and wholesale marketing that conducts business in the United States and Canada.

Contracts and other activities at our Energy Marketing operations are accounted for under accounting standards for energy trading contracts. As such, all of the contracts and other activities at our marketing operations that meet the definition of a derivative are accounted for at fair value. The fair values are recorded as either Derivative assets or Derivative liabilities on the accompanying Condensed Consolidated Balance Sheets. The net gains or losses are recorded as Operating revenues in the accompanying Condensed Consolidated Statements of Income. Accounting for energy trading contracts precludes mark-to-market accounting for energy trading contracts that are not defined as derivatives pursuant to accounting standards for derivatives. As part of our marketing operations, we often employ strategies that include derivative contracts along with inventory, storage and transportation positions to accomplish the objectives of our producer services, end-use origination and wholesale marketing groups. Except in limited circumstances when we are able to designate transportation, storage or inventory positions as part of a fair value hedge, accounting for derivatives and hedging generally does not allow us to mark inventory, transportation or storage positions to market. The result is that while a significant majority of our marking the rest of our economic hedges (transportation, inventory or storage) to market. Volatility in reported earnings and derivative positions results from these accounting requirements.

To effectively manage our portfolios, we enter into forward physical commodity contracts, financial derivative instruments including over-the-counter swaps and options, and storage and transportation agreements. The business activities of our Energy Marketing segment are conducted within the parameters as defined and allowed in the BHCRPP and further delineated in the Energy Marketing Risk Management Policies and Procedures as approved by our Executive Risk Committee. Our trading contracts do not include credit risk-related contingent features that require us to maintain a specific credit rating.

We use a number of quantitative tools to measure, monitor and limit our exposure to market risk in our marketing portfolio. We limit and monitor our market risk through established limits on the nominal size of positions based on type of trade, location and duration. Such limits include those on fixed price, basis, index, storage, transportation and foreign exchange positions.

Daily risk management activities include reviewing positions in relation to established position limits, assessing changes in daily mark-to-market and other non-statistical risk management techniques.

The contract or notional amounts and terms of our marketing activities and derivative commodity instruments were as follows:

Derivatives and certain other marketing activities were marked to fair value and the related gains and/or losses recognized in earnings. The amounts included in the accompanying Condensed Consolidated Balance Sheets and Condensed Statements of Income were as follows (in thousands):

		March 31, 2011	December 31, 2010	March 31, 2010		
Derivative assets, current	\$	41,482	\$ 43,862	\$	40,541	
Derivative assets, non-current	\$	3,951	\$ 6,635	\$	2,409	
Derivative liabilities, current	\$	31,167	\$ 14,550	\$	17,733	
Derivative liabilities, non-current	\$	(236)	\$ 3,464	\$	(588)	
Cash collateral receivable (payable) included in derivative assets/liabilities	\$	2,984	\$ 3,958	\$	171	
Unrealized gain	\$	11,518	\$ 28,525	\$	25,634	

In addition, certain volumes of natural gas inventory have been designated as the underlying hedged item in fair value hedge transactions. These volumes include market adjustments based on published industry quotations. Market adjustments are recorded in Materials, supplies and fuel on the accompanying Condensed Consolidated Balance Sheets and the related unrealized gain/loss on the Condensed Consolidated Statements of Income, effectively offsetting the earnings impact of the unrealized gain/loss recognized on the associated derivative asset or liability described above. As of March 31, 2011, December 31, 2010 and March 31, 2010, the market adjustments recorded in Materials, supplies and fuel were \$0.3 million, \$(9.1) million and \$(11.0) million, respectively.

Activities Other Than Trading

Oil and Gas Exploration and Production

We produce natural gas and crude oil through our exploration and production activities. Our natural "long" positions, or unhedged open positions, result in commodity price risk and variability to our cash flows. We employ risk management methods to mitigate this commodity price risk and preserve our cash flows and we have adopted guidelines covering hedging for our natural gas and crude oil production. These guidelines have been approved by our Executive Risk Committee, and are routinely reviewed by our Board of Directors.

We held a portfolio of swaps and options to hedge portions of our crude oil and natural gas production. We elect hedge accounting on those over-the-counter swaps and options. These transactions were designated at inception as cash flow hedges, documented under accounting for derivatives and hedging, and initially met prospective effectiveness testing. Effectiveness of our hedging position is evaluated at least quarterly.

The derivatives were marked to fair value and are recorded as Derivative assets or Derivative liabilities on the accompanying Condensed Consolidated Balance Sheets. The effective portion of the gain or loss on these derivatives is reported in Accumulated other comprehensive income (loss) and the ineffective portion is reported in earnings.

We held the following derivatives and related balances (dollars in thousands):

		<u>March 31, 2011</u>			December 31, 2010					March 31, 2010			
		Crude Oil Swaps/ Options		Natural Gas Swaps		Crude Oil Swaps/ Options		Natural Gas Swaps		Crude Oil Swaps/ Options		Natural Gas Swaps	
Notional*		487,500		5,974,800		424,500		6,821,800		565,500		10,142,050	
Maximum terms in years **		1		0.25		0.25		0.25		0.25		0.75	
Derivative assets, current	\$	108	\$	6,649	\$	248	\$	7,675	\$	2,816	\$	9,151

balance sheets	\$	(7,613)	\$	7,467	\$	(5,313)	\$	10,281	\$	(1,908)	\$	12,346	
Earnings	\$	355	\$	—	\$	465	\$	—	\$	861	\$	—	

* Crude oil in Bbls, gas in MMBtu.

** Refers to the term of the derivative instrument. Assets and liabilities are classified as current/non-current based on the timing of the hedged transaction and the corresponding settlement of the derivative instrument.

Based on March 31, 2011 market prices, a \$1.6 million gain would be realized and reported in pre-tax earnings during the next 12 months related to hedges of production. Estimated and actual realized gains will likely change during the next 12 months as market prices change.

Gas Utilities - Gas Hedges

Our Gas Utilities segment purchases and distributes natural gas in four states. During the winter heating season, our gas customers are exposed to the effect of volatile natural gas prices; therefore, as allowed or required by state utility commissions, we have entered into certain exchange traded natural gas futures, options and basis swaps to reduce our customers' underlying exposure to these fluctuations. These transactions are considered derivatives in accordance with accounting standards for derivatives and mark-to-market adjustments are recorded as Derivative assets or Derivative liabilities on the accompanying Condensed Consolidated Balance Sheets. Gains and losses, as well as option premiums upon settlement, on these transactions are recorded as Regulatory assets or Regulatory liabilities in accordance with accounting standards for regulated operations. Accordingly, the earnings impact is recognized in the Consolidated Income Statements as a component of PGA costs when the related costs are recovered through our rates as part of PGA costs in operating revenue.

The contract or notional amounts and terms of our natural gas derivative commodity instruments held at our Gas Utilities were as follows:

	Outstandi March 31.	0	Outstand December 3	0	Outstandi March 31	8
	WidiCil 51,	Latest	December 3	Latest		Latest
	Notional Amounts (MMBtus)	Expiration (months)	Notional Amounts (MMBtus)	Expiration (months)	Notional Amounts (MMBtus)	Expiration (months)

Option premium included in Derivative assets, current	\$ —	\$ 842	\$ —

Financing Activities

We are exposed to interest rate risk associated with fluctuations in the interest rate on our variable interest rate debt. To manage this risk, we have entered into floating-to-fixed interest rate swap agreements with the intention to convert the debt's variable interest rate to a fixed rate.

Our interest rate swaps and related balances were as follows (dollars in thousands):

	<u>March 31, 2011</u>			Decembe	<u>er 31,</u>	2010	March 31, 2010			
	Designated Interest Rate Swaps		Dedesignated Interest Rate Swaps*	Designated Interest Rate Swaps		Dedesignated Interest Rate Swaps*		Designated Interest Rate Swaps		Dedesignated Interest Rate Swaps*
Current notional amount	\$ 150,000	\$	250,000	\$ 150,000	\$	250,000	\$	150,000	\$	250,000
Weighted average fixed interest rate	5.04%		5.67%	5.04%		5.67%		5.04%		5.67%
Maximum terms in years	5.75		0.75	6.00		1.00		6.75		0.75
Derivative liabilities, current	\$ 6,769	\$	48,515	\$ 6,823	\$	53,980	\$	6,571	\$	41,822
Derivative liabilities, non-current	\$ 12,955	\$	_	\$ 14,976	\$	_	\$	10,917	\$	_
Pre-tax accumulated other comprehensive gain (loss) included in Condensed Consolidated Balance Sheets	\$ (19,724)	\$	_	\$ (21,799)	\$	_	\$	(17,488)	\$	_
Pre-tax (loss) gain included in Condensed Consolidated Income Statements	\$ _	\$	5,465	\$ _	\$	(15,193)	\$	_	\$	(3,035)

* Maximum terms in years reflect the amended mandatory early termination dates of the seven and 17 year de-designated swaps. If the mandatory early termination dates are not extended, the swaps will require cash settlement based on the swap value on the termination date.

Based on March 31, 2011 market interest rates and balances related to our \$150.0 million in designated interest rate swaps, a loss of approximately \$6.8 million would be realized and reported in pre-tax earnings during the next 12 months. Estimated and realized losses will likely change during the next 12 months as market interest rates change. Note 13 provides further information related to the \$250 million notional swaps that are not designated as hedges for accounting purposes.

Foreign Exchange Contracts

Our Energy Marketing segment conducts its marketing in the United States and Canada. Transactions in Canada are generally transacted in Canadian dollars and create exchange rate risk for us. To mitigate this risk, we enter into forward currency exchange contracts to offset earnings volatility from changes in exchange rates between the Canadian and United States dollar.

We had the following outstanding forward contracts included in Derivative assets or Derivative liabilities on the accompanying Condensed Consolidated Balance Sheets as follows (in thousands):

	As of March	<u>31, 2011</u>		As of Decem	<u>ber 31, 2010</u>	As of Marc	<u>h 31, 2010</u>

Realized foreign exchange gain (loss)	\$	338 \$	(141)

(13) FAIR VALUE MEASUREMENTS

Derivative Financial Instruments

Financial assets and liabilities carried at fair value are classified and disclosed in one of the following three categories:

Level 1 — Unadjusted quoted prices available in active markets that are accessible at the measurement date for identical unrestricted assets or liabilities. This level primarily consists of financial instruments such as exchange-traded securities or listed derivatives.

Level 2 — Pricing inputs include quoted prices for identical or similar assets and liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability and inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 — Pricing inputs include significant inputs that are generally less observable from objective sources. These inputs reflect management's best estimate of fair value using its own assumptions about the assumptions a market participant would use in pricing the asset or liability.

Recurring Fair Value Measures

Assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. Our assessment of the significance of a particular input to the fair value measurement requires judgment and may affect the placement within the fair value hierarchy levels. The following tables set forth by level within the fair value hierarchy our assets and liabilities that were accounted for at fair value on a recurring basis (in thousands):

			A	s of March 31, 2	2011		
	Level 1	Level 2		Level 3		Counterparty Netting and Cash Collateral ^(a)	Total

(a) Cash Collateral on deposit in margin accounts under master netting agreements at March 31, 2011, December 31, 2010 and March 31, 2010 totaled a net \$6.7 million, \$14.3 million and \$8.3 million, respectively.

The following tables present the changes in level 3 recurring fair value for the three months ended March 31, 2011 and 2010, respectively (in thousands):

	Three Mor	ths Ended March 31, 2011
		Commodity Derivatives
alance as of beginning of period	\$	5,779
Unrealized losses		(6,199)
Unrealized gains		6,201

Purchases	_
Issuances	—
Settlements	(2,219)
Transfers into level 3 ^(a)	820
Transfers out of level 3 ^(b)	31
Balances at end of period	\$ 4,413
Changes in unrealized gains (losses) relating to instruments still held as of quarter-end	\$ (1,027)

	Com	led March 31, 2010 modity vatives
Balance as of beginning of period	\$	(556)
Unrealized losses		(1,215)
Unrealized gains		1,381
Purchases, issuance and settlements		(307)
Transfers into level 3 ^(a)		—
Transfers out of level 3 ^(b)		1,992
Balances at end of period	\$	1,295
Changes in unrealized gains (losses) relating to instruments still held as of quarter-end	\$	1,745

(a) Transfers into level 3 represent assets and liabilities that were previously categorized as a higher level for which the inputs became unobservable.

(b) Transfers out of level 3 represent assets and liabilities that were previously classified as level 3 for which the lowest significant input became observable during the period.

Gains and (losses) (realized and unrealized) for level 3 commodity derivatives totaling less than \$(0.1) million and \$0.3 million for the three months ended March 31, 2011 and 2010, respectively, are included in Operating revenues on the accompanying Condensed Consolidated Statements of Income while less than \$0.1 million and \$(0.1) million was recorded through Accumulated other comprehensive income (loss) on the accompanying Condensed Consolidated Balance Sheets for the three months ended March 31, 2011 and 2010, respectively. Commodity derivatives classified as level 3, may be economically hedged as part of a total portfolio of instruments that may be classified in level 1 or 2, or with instruments that may not be accounted for at fair value. Accordingly, gains and losses associated with level 3 balances may not necessarily reflect trends occurring in the underlying business. Further, unrealized gains and losses for the period from level 3 items may be offset by unrealized gains and losses in positions classified in level 1 or 2, as well as positions that have been realized during the quarter.

Fair Value Measures

As required by accounting standards for derivatives and hedges, fair values within the following tables are presented on a gross basis and do not reflect the netting of asset and liability positions. Further, the amounts do not include net cash collateral of \$6.7 million, \$14.3 million and \$8.3 million on deposit in margin accounts at March 31, 2011, December 31, 2010, and March 31, 2010, respectively, to collateralize certain financial instruments, which is included in Derivative assets - current, Derivative assets - non-current and/or Derivative liabilities - current. Therefore, the gross balances are not indicative of either our actual credit exposure or net economic exposure. Additionally, the amounts below will not agree with the amounts presented on our Condensed Consolidated Balance Sheets, nor will they correspond to the fair value measurements presented in Note 12.

The following tables present the fair value and balance sheet classification of our derivative instruments (in thousands):

	As of March 31, 2011				
	Balance Sheet Location		Fair Value of Asset Derivatives		Fair Value of Liability Derivatives

(9.011)

\$

The following methods and assumptions were used to estimate the fair value of each class of our financial instruments.

Cash, Cash Equivalents

The carrying amount approximates fair value due to the short maturity of these instruments.

Restricted Cash

Restricted cash is primarily related to cash held in escrow as required by Black Hills Wyoming project financing agreements.

Derivative Financial Instruments

Derivative financial instruments are carried at fair value. Our fair value measurements are developed using a variety of inputs by our risk management group, which is independent of the trading function. These inputs include unadjusted quoted prices where available; prices published by various third-party providers; and, when necessary, internally developed adjustments. In many cases, the internally developed prices are corroborated with external sources. Some of our transactions take place in markets with limited liquidity and limited price visibility. Additionally, descriptions of the various instruments we use and the valuation method employed are included in Notes 12 and 13.

Notes Payable

The carrying amount approximates fair value due to the variable interest rates with short reset periods.

Long-Term Debt

The fair value of our long-term debt is estimated based on quoted market rates for debt instruments having similar maturities and similar debt ratings. The first mortgage bonds issued by Black Hills Power and Chevenne Light are either currently not callable or are subject to make-whole provisions which would eliminate any economic benefits if we were to call these bonds.

(15) COMMITMENTS AND CONTINGENCIES

Legal Proceedings

We are subject to various legal proceedings, claims and litigation as described in Note 19 of the Notes to our Consolidated Financial Statements in our 2010 Annual Report on Form 10-K. There are no material proceedings that have developed, no material developments with respect to existing legal proceedings and no material proceedings have terminated during the first three months of 2011.

In the normal course of business, we are subject to various lawsuits, actions, proceedings, claims and other matters asserted under laws and regulations. We believe the amounts provided in our consolidated financial statements are adequate in light of the probable and estimable contingencies. However, there can be no assurance that the actual amounts required to satisfy alleged liabilities from various legal proceedings, claims and other matters discussed below, and to comply with applicable laws and regulations, will not exceed the amounts reflected in our consolidated financial statements. As such, costs, if any, that may be incurred in excess of those amounts provided as of March 31, 2011, cannot be reasonably determined and could have a material adverse effect on our results of operations or financial position.

Guarantees

As of December 31, 2010, the Company had provided a guarantee for up to \$7.0 million of Enserco's obligations under an agency agreement. During the first quarter of 2011 the guarantee expired upon fulfillment of all obligations under the contract.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

We are a diversified energy company operating principally in the United States with two major business groups — Utilities and Non-regulated Energy. We report our business groups in the following reportable operating segments:

Business Group	Financial Segment
Utilities	Electric Utilities
	Gas Utilities
Non-regulated Energy	Oil and Gas
	Power Generation
	Coal Mining
	Energy Marketing

Our Utilities Group consists of our Electric and Gas Utility segments. Our Electric Utilities generate, transmit and distribute electricity to approximately 201,000 customers in South Dakota, Wyoming, Colorado and Montana. In addition, Cheyenne Light, which is reported within the Electric Utilities segment, also provides natural gas to approximately 34,500 customers in Wyoming. Our Gas Utilities serve approximately 527,000 natural gas customers in Colorado, Nebraska, Iowa and Kansas. Our Non-regulated Energy Group engages in the production of coal, natural gas and crude oil primarily in the Rocky Mountain region; the production of electric power from our generating plants and the sale of electric energy and capacity primarily under long-term contracts; and the marketing of natural gas, crude oil, coal, power, environmental products and related services in the United States and Canada.

Certain industries in which we operate are highly seasonal and revenues from, and certain expenses for, such operations may fluctuate significantly among quarterly periods. Demand for electricity and natural gas is sensitive to seasonal cooling, heating and industrial load requirements, as well as market price. In particular, the normal peak usage season for gas utilities is November through March and significant earnings variances can be expected between the Gas Utilities segment's peak and off-peak seasons. Due to this seasonal nature, our results of operations for the three months ended March 31, 2011 and 2010, and our financial condition as of March 31, 2011, December 31, 2010, and March 31, 2010. are not necessarily indicative of the results of operations and financial condition to be expected as of or for any other period.

See Forward-Looking Information in the Liquidity and Capital Resources section of this Item 2, beginning on Page 58.

Results of Operations

The following business group and segment information does not include intercompany eliminations. Minor differences in amounts may result due to rounding. All amounts are presented on a pre-tax basis unless otherwise indicated.

Executive Summary, Significant Events and Overview

Three Months Ended March 31, 2011 Compared to Three Months Ended March 31, 2010. Net income for the three months ended March 31, 2011 was \$26.9 million, or \$0.68 per share, compared to Net income of \$31.4 million, or \$0.81 per share, reported for the same period in 2010. The 2011 Net income includes a \$3.6 million non-cash after-tax unrealized mark-to-market gain on certain interest rate swaps. The 2010 Net income included a \$2.0 million non-cash after-tax unrealized mark-to-market loss on these same interest rate swaps and a \$1.7 million after-tax gain on sale of operating assets at Nebraska Gas.

	Three Months Ended March 31,				
	2011		20	010	
<u>Operating Revenues *</u>					
Utilities	\$	378,535	\$	391,979	
Non-regulated Energy		43,486		51,563	
Intercompany eliminations		(18,721)		(17,042)	
	\$	403,300	\$	426,500	
<u>Net income (loss)</u>					
Utilities	\$	29,512	\$	29,350	
Non-regulated Energy		(3,536)		7,051	
Corporate		934		(4,967)	
	\$	26,910	\$	31,434	

* 2010 Operating Revenues have been restated to eliminate inter-company revenues previously not eliminated.

This change did not have an impact on our gross margin or net income.

Net income decreased \$4.5 million for the three months ended March 31, 2011 reflecting the following:

Utilities

- A \$0.4 million increase in Electric Utilities earnings;
- A \$0.2 million decrease in the Gas Utilities earnings;

Non-regulated Energy

- A \$3.1 million decrease in Oil and Gas earnings;
- A \$2.6 million decrease in Coal Mining earnings;
- A \$5.0 million decrease in Energy Marketing earnings;
- Power Generation earnings comparable to first quarter of 2010; and

Corporate

• A \$5.9 million decrease in unallocated Corporate expenses.

Business Group highlights are as follows:

Utilities Group

New and interim rates were implemented in five utility jurisdictions during 2010. Consequently, revenues have been positively impacted for rates that were not in effect in the prior period.

Utility	State	Effective Date	enue Increase (in llions)
Black Hills Power	SD	4/2010	\$ 15.2
Black Hills Power	WY	6/2010	\$ 3.1
Colorado Electric	СО	8/2010	\$ 17.9
Nebraska Gas	NE	3/2010	\$ 8.3
Iowa Gas	IA	6/2010	\$ 3.4
			\$ 47.9

- Effective February 10, 2011 the IUB approved a settlement agreement for an increase in annual utility revenue of \$3.4 million at Iowa Gas. Interim rates equal to a \$2.6 million increase went into effect in June 2010;
- Construction of gas-fired generation to serve Colorado Electric customers is moving forward to start providing energy by the end of 2011. The 180 MW generation project is expected to cost approximately \$227 million, of which \$212.9 million has been expended through March 31, 2011;
- On April 28, 2011, Colorado Electric filed a request with the CPUC for a revenue increase of \$40.2 million to recover costs associated with the 180 MW generation project and other utility infrastructure assets and expenses, including PPA costs associated with the 200 MW Colorado IPP generation facility. The proposed rate increase would go into effect on January 1, 2012 to coincide with the expiration of the PPA with PSCo that is being replaced with the new 380 MW of gas-fired generation;
- On April 28, 2011, Black Hills Power filed a request for declaratory ruling from the SDPUC asking to confirm that a proposed 20 MW wind farm site near Belle Fourche, SD is reasonable and cost effective. This \$38.0 million project would be owned by Black Hills Power and advance our progress toward the State of South Dakota's objective that 10% of all electricity sold be obtained from renewable, recycled and conserved energy resources by 2015;

- On March 24, 2011, Colorado Electric filed a proposal with the CPUC to rate base 50% ownership in a 29 MW wind turbine project as part of its plan to meet Colorado's Renewable Energy Standard. Our share of this project is expected to cost approximately \$27.0 million and is expected to begin serving Colorado Electric customers no later than December 31, 2012;
- On March 14, 2011, Colorado Electric filed a request for a CPCN to construct a third utility-owned natural gas-fired turbine with an approximate cost of \$102.0 million, excluding transmission. This CPCN request was filed in accordance with a December 2010 CPUC order. This order approved the retirement of the W.N. Clark coal-fired power plant under the Colorado Clean Air-Clean Jobs Act and granted a presumption of need for a third turbine; and
- Due to the annexation of an outlying suburb by the City of Omaha, Nebraska, Nebraska Gas sold assets serving approximately 3,000 customers to Metropolitan Utilities District on March 2, 2010. Nebraska Gas received \$6.1 million in cash and recognized a \$1.7 million after-tax gain on the sale of assets in the first quarter of 2010.

Non-regulated Energy Group

Construction of gas-fired generation at Colorado IPP to serve a 20-year PPA with Colorado Electric is moving forward to start providing energy by the end of 2011. The 200 MW project is
expected to cost approximately \$260 million, of which \$203.1 million has been expended through March 31, 2011.

Corporate

We recognized a non-cash unrealized mark-to-market gain related to certain interest rate swaps of \$5.5 million for the first three months of 2011 compared to a \$3.0 million non-cash unrealized mark-to-market loss on these swaps for the same period in 2010.

Following are additional details regarding the results of operations by business segment for our Utilities and Non-regulated Energy Groups, and Corporate activities.

Utilities Group

We report two segments within the Utilities Group: Electric Utilities and Gas Utilities. The Electric Utilities segment includes the electric operations of Black Hills Power and Colorado Electric, and the electric and natural gas operations of Cheyenne Light. The Gas Utilities segment includes the regulated natural gas utility operations of Black Hills Energy in Colorado, Nebraska, Iowa and Kansas.

1,948,705

242,175 2,042,836 Three Months Ended March 31, 2011 Compared to Three Months Ended March 31, 2010. Net income was \$10.2 million for the three months ended March 31, 2011 compared to \$9.9 million for the three months ended March 31, 2010 as a result of:

<u>Gross margin</u>: Gross margin increased \$10.1 million primarily due to an increase of \$12.0 million resulting from Black Hills Power and Colorado Electric rate cases implemented during 2010 and additional margins of \$1.1 million related to recent transmission investments. These increases were partially offset by a decrease in off-system sales margin, lower retail quantities at Colorado Electric, and a decrease in revenue resulting from two previous wholesale power customers acquiring an ownership interest in Wygen III. Colorado Electric has an agreement with the CPUC which requires the deferral of off-system operating income until a sharing mechanism is settled upon. Due to the agreement Colorado Electric deferred \$0.3 million in off-system operating income during the quarter.

Operations and maintenance: Operations and maintenance increased \$4.3 million primarily due to additional costs associated with Wygen III which began commercial operation on April 1, 2010, an increase in employee compensation and benefit costs and increased corporate allocations.

Depreciation and amortization: Depreciation and amortization increased \$1.6 million primarily due to commencement of depreciation on the Wygen III plant.

Interest expense, net: Interest expense, net increased \$1.7 million primarily due to higher debt balances related to recent capital projects and higher interest rates.

Other income: Other income decreased \$1.7 million primarily due to lower AFUDC-equity due to the placement of Wygen III into commercial operation.

Income tax expense: The effective tax rate for the Electric Utilities for the three months ended March 31, 2011 was comparable to the same period in the prior year.

* Kansas Gas has a 30-year weather normalization adjustment mechanism in place that neutralizes the impact of weather on revenues.

Our Gas Utilities are highly seasonal and sales volumes vary considerably with weather and seasonal heating and industrial loads. Over 70% of our Gas Utilities' revenues and margins are expected in the fourth and first quarters of each year. Therefore, revenues for and certain expenses of, these operations fluctuate significantly among quarters. Depending upon the state jurisdiction, the winter heating season begins around November 1 and ends around March 31.

Three Months Ended March 31, 2011 Compared to Three Months Ended March 31, 2010. Net income was \$19.3 million in the three months ended March 31, 2011 compared to Net income of \$19.5 million for the three months ended March 31, 2010 as a result of:

Gross margin: Gross margin increased \$1.4 million primarily due to approved rate cases, partially offset by 4% lower volumes.

<u>Operations and maintenance</u>: Operations and maintenance was comparable to the same period in the prior year.

Depreciation and amortization: Depreciation and amortization decreased \$1.0 million primarily due to assets that became fully depreciated during 2010.

Interest expense, net: Interest expense, net increased \$0.8 million primarily due to higher interest rates, partially offset by increased intercompany interest income.

Other income (expense): Other income (expense) was comparable to the same period in the prior year.

Income tax benefit (expense): The effective tax rate for the three months ended March 31, 2011 was comparable to the same period in the prior year.

<u>Regulatory Matters — Utilities Group</u>

The following summarizes our recent state and federal rate case and surcharge activity (dollars in millions):

Approved Capital Structure

(1) In December 2009, Nebraska Gas filed a rate case with the NPSC and interim rates went into effect on March 1, 2010. On August 18, 2010 NPSC issued a decision approving an annual revenue increase of approximately \$8.3 million effective on September 1, 2010. A refund to customers for the difference between interim rates and approved rates was completed in the first quarter of 2011. The Public Advocate has filed several appeals which the NPSC has denied. The Public Advocate has filed a notice of appeal with the Court of Appeals.

- (2) On June 8, 2010, Iowa Gas filed a request with the IUB for a \$4.7 million, or 2.9%, revenue increase to recover the cost of capital investments made in our gas distribution system and other expense increases incurred since December 2008. Interim rates, subject to refund, equal to a \$2.6 million increase, or 1.6%, in revenues went into effect on June 18, 2010. In August 2010, we reached a settlement with the OCA for a revenue increase of \$3.4 million and hearings on the settlement were held in October 2010. Approval from the IUB of a modified settlement for a revenue increase of \$3.4 million was received on February 10, 2011.
- (3) This rate case was previously described in our 2010 Annual Report filed on Form 10-K.
- (4) On January 5, 2010, Colorado Electric filed a rate case with CPUC requesting an electric revenue increase primarily related to the recovery of rising costs from electricity supply contracts, as well as recovery for investment in equipment and electricity distribution facilities necessary to maintain and strengthen the reliability of the electric delivery system. Colorado Electric requested a \$22.9 million, or approximately 12.8%, increase in annual revenues. On August 5, 2010, the CPUC approved a settlement agreement for \$17.9 million in annual revenues with a return on equity of 10.5% and a capital structure of 52% equity and 48% debt. New rates were effective August 6, 2010.

Included in the rate case order was a provision that off-system operating income be shared with customers commencing August 6, 2010. The percentage of operating income to be shared with the customers was not resolved at the time of the rate case settlement. The CPUC has therefore required that the off-system operating income earned beginning August 6, 2010 be deferred on the balance sheet until settlement of the sharing mechanism. Colorado Electric filed a proposal for a sharing mechanism with the CPUC on April 27, 2011. Since August 2010, \$1.0 million in off-system operating income has been deferred.

(5) On April 28, 2011, Colorado Electric filed a request with the CPUC for an annual revenue increase of \$40.2 million, or 18.8%, to recover costs associated with the 180 MW generating facility currently under construction, associated infrastructure assets and other utility expenses, including the PPA with Colorado IPP. The facilities are expected to be in operation by the end of 2011.

Non-regulated Energy Group

(a) Powder River and Williston are prim	narily oil producing properties v	with r	elatively higher	opera	ating expenses	on a p	er Mcfe basis.					

Three Months Ended March 31, 2011 Compared to Three Months Ended March 31, 2010. Net loss was \$0.7 million for the three months ended March 31, 2011 compared to Net income of \$2.3 million for the same period in 2010 as a result of:

<u>Revenue</u>: Revenue decreased \$1.8 million primarily due to a 21% decrease in the average hedged price of natural gas and a 10% decrease in the average hedged price of crude oil, partially offset by a 23% increase in crude oil volumes primarily from new wells in our ongoing Bakken drilling program in North Dakota. The decrease in crude oil price was influenced by fixed price swaps previously entered into at prices significantly below current crude oil market prices. These swaps represent approximately 58% of our crude oil volume for the current quarter. Gas volumes, exclusive of gas liquids, decreased 1%.

Operations and maintenance: Operations and maintenance costs increased \$0.8 million primarily due to increased compensation costs and ad valorem taxes.

Depreciation, depletion and amortization: Depreciation, depletion and amortization increased \$1.2 million primarily due to a higher depletion rate and increased production. The increase in the depletion rate reflects the addition of higher cost crude oil reserves, primarily attributable to our Bakken drilling activities.

Interest expense, net: Interest expense, net increased \$0.6 million primarily due to higher interest rates.

Other income (expense): Other income (expense) decreased \$0.5 million primarily due to lower earnings from equity investments.

Income tax (expense) benefit: Income tax (expense) benefit for the first quarter of 2011 was impacted primarily by a \$0.3 million credit for research and development projects.

	Three Month	s Ended Ma	rch 31,					
	2011		2010					
	(in thousands)							
Revenue	\$ 15,495	\$	13,980					
Operations and maintenance	14,572		10,241					
Depreciation, depletion and amortization	4,618		2,890					
Total operating expenses	19,190		13,131					
Operating income (loss)	(3,695)	849					
Interest income, net	960		318					
Other income	569		556					
Income tax benefit (expense)	868		(377)

The following table provides certain operating statistics for our Coal Mining segment (in thousands):

	Th	ree Months Ended March	h 31,
	2011		2010
Tons of coal sold		1,370	1,392
Cubic vards of overburden moved		3,455	3,571

Three Months Ended March 31, 2011 Compared to Three Months Ended March 31, 2010. Net loss was \$1.3 million for the three months ended March 31, 2011 compared to Net income of \$1.3 million in the same period in 2010, as a result of:

<u>Revenue</u>: Revenue increased \$1.5 million primarily due to a 10% increase in average price received per ton. The higher average sales price reflects the impact of price escalators in certain of our coal sales contracts. Approximately 35% of our coal production is sold under contracts where the sales price escalates based on actual mining cost increases. In addition, approximately 60% of our production is sold under contracts where the sales price escalates which may not necessarily represent changes in actual mining costs. The increase in price received per ton during the quarter was partially offset by a 2% decrease in tons sold. Sales volumes decreased in 2011 as new quantities sold to the Wygen III plant beginning in April 2010 were more than offset by the negative impact from plant outages and the suspension of operations at the Osage power plant.

<u>Operations and maintenance</u>: Operations and maintenance costs increased \$4.3 million. Cost increases are reflective of the current phase of our mine where we have longer haul distances and higher overburden stripping costs. Additionally we experienced higher costs associated with drilling and blasting, equipment maintenance, fuel, and staffing levels for our train load-out facility. As noted above, approximately 60% of our production is sold under contracts which have price escalators based on published indices. These escalators have not kept up with actual mining cost increases, reducing coal mine operating income, which is expected to continue to negatively impact 2011 results. Previous periods also included the capitalization of certain costs associated with mine infrastructure, including our in-pit conveyor system that is used to transport coal to mine-mouth generation facilities.

Depreciation, depletion and amortization: Depreciation, depletion and amortization expense increased \$1.7 million related to reclamation costs and increased depreciation on equipment.

Interest income, net: Interest income, net increased \$0.6 million primarily due to increased lending to affiliates at higher interest rates.

Other income: Other income was comparable to the same period in the prior year.

Income tax benefit (expense): The tax benefit for the period ending March 31, 2011 was favorably impacted by research and development credits recorded. Tax expense recorded for the period ended March 31, 2010 was favorably impacted by the benefit generated by percentage depletion.

Energy Marketing

	Thr 2011		Ended March 31, 2010)
		(in the	ousands)

	_				-		-		_	

(a) Coal marketing activity began June 1, 2010, the acquisition date of the coal marketing portfolio.
 (b) Power and environmental marketing commenced operations late in third quarter of 2010.

Following is a summary of average daily quantities marketed:

	Three Months Ende	d March 31,
	2011	2010
Natural gas physical sales — MMBtus	1,730,183	1,753,200
Crude oil physical sales — Bbls	21,243	13,430
Coal physical sales — Tons	36,532	—

Gas, oil and coal inventory held by Energy Marketing primarily consists of gas held in storage. Such gas is being held in inventory to capture the price differential between the time at which it was purchased and a subsequent sales date. Quantities held were as follows:

	As of March 31, 2011	As of December 31, 2010	As of March 31, 2010
Natural gas (MMBtus)	1,567,070	14,922,353	10,328,896
Crude oil (Bbls)	143,647	198,052	74,140
Coal (Tons)	40,095	1,529	_

Three Months Ended March 31, 2011 Compared to Three Months Ended March 31, 2010. Net loss was \$2.6 million for the three months ended March 31, 2011 compared to Net income of \$2.2 million in the same period in 2010 as a result of:

<u>Gross margin</u>: Gross margin decreased \$7.3 million primarily driven by lower gross margin from both natural gas and crude oil marketing compared to the 2010 period. Power marketing activities, which began during the third quarter of 2010, produced a slight gross margin loss for the three months ended March 31, 2011. These decreases to gross margin were partially offset by approximately \$2.7 million in gross margin provided by the coal marketing operations that began in the second quarter of 2010.

Operating expenses: Operating expenses increased \$0.3 million primarily due to higher compensation expense related to staff marketing new commodities in new geographic regions, and an increase in fees primarily related to usage of letters of credit.

Depreciation and amortization: Depreciation and amortization were comparable to the same period in the prior year.

Interest expense, net: Interest expense, net was comparable to the same period in the prior year.

Other income (expense): Other income (expense) was comparable to the same period in the prior year.

Income tax (expense) benefit: The effective income tax rate for the three months ended March 31, 2011 was comparable to the same period in the prior year.

Power Generation

	Three Months Ended March 31,				
	2011		2010		
	 (in tho	usands)			
Revenue	\$ 7,620	\$		8,068

Total operating expenses	5,252			4,402	
Operating income	2,368			3,666	
Interest expense, net	(1,791)			(1,997)	
Other (expense) income	1,204			(11)	
Income tax expense	(595)			(578)	
Net income	\$ 1,186	\$		1,080	

The following table provides certain operating statistics for our plants within the Power Generation segment:

Three Months Ended March 31,

	2011	2010
Contracted power plant fleet availability:		
Coal-fired plant	100.0%	100.0%
Natural gas-fired plant	100.0%	100.0%
Total availability	100.0%	100.0%

Three Months Ended March 31, 2011 Compared to Three Months Ended March 31, 2010. Net income was \$1.2 million for the three months ended March 31, 2011 compared to Net income of \$1.1 million in the same period in 2010 as a result of:

<u>Revenue</u>: Revenue decreased primarily due to lower off-system sales.

Operations and maintenance: Operations and maintenance costs increased \$0.8 million primarily due to increased corporate allocations associated with Colorado IPP and higher Wygen I operating costs.

Depreciation and amortization: Depreciation and amortization were comparable to the same period in the prior year.

Interest expense, net: Interest expense, net was comparable to the same period in the prior year.

Other (expense) income: Other (expense) income increased \$1.2 million primarily due to higher earnings from our partnership investments and a gain on the sale of our ownership interest in the partnership which owned certain Idaho generation facilities.

Income tax expense: The effective tax rate for the three months ended March 31, 2011 was comparable to the same period in the prior year.

Corporate

Three Months Ended March 31, 2011 Compared to Three Months Ended March 31, 2010. Net income was \$0.9 million for the three months ended March 31, 2011 compared to Net loss of \$5.0 million for the three months ended March 31, 2010 as a result of:

An unrealized net, non-cash mark-to-market gain for the quarter ended March 31, 2011 of approximately \$5.5 million on certain interest rate swaps compared to a \$3.0 million unrealized net, non-cash mark-to-market loss on these interest rate swaps in the prior period.

Critical Accounting Policies

There have been no material changes in our critical accounting policies from those reported in our 2010 Annual Report on Form 10-K filed with the SEC. For more information on our critical accounting policies, see Part II, Item 7 of our 2010 Annual Report on Form 10-K.

Cash Flow Activities

The following table summarizes our cash flows for the three months ended March 31, 2011 and 2010 (in thousands)

Cash provided by (used in):	2011	2010
Operating activities	\$ 111,271 \$	88,919
Investing activities	\$ (121,758) \$	(78,050)
Financing activities	\$ 22,065 \$	12,253

2011 Compared to 2010

Operating Activities

Net cash provided by operating activities was \$22.4 million higher than in 2010 primarily attributable to:

- Cash earnings (net income plus non-cash adjustments) were \$24.8 million higher than the prior year.
- Inflows from operating assets and liabilities were \$14.8 million which is a decrease of \$12.4 million from the prior year as a result of:
 - Net outflows from working capital accounts were \$29.2 million which is a decrease of \$50.3 million from the prior year net inflows from working capital accounts. In addition to normal
 working capital changes, 2011 reflects increased cash inflows from higher withdrawals of gas storage inventories by Energy Marketing and Gas Utilities. Energy Marketing also
 experienced higher outflows in the current period related to higher margin posted on marketing transactions; and
 - Inflows from changes in regulatory assets and regulatory liabilities, primarily related to collection of gas costs by our Gas Utilities.

Investing Activities

Net cash used in investing activities was \$43.7 million more than in 2010 reflecting higher capital additions. During 2011, cash outflows for property, plant and equipment additions totaled \$122.5 million, including the partial completion of construction of 180 MW of natural gas-fired electric generation at Colorado Electric and 200 MW of natural gas-fired electric generation at Black Hills Colorado IPP, and oil and gas property maintenance capital and development drilling.

Financing Activities

Net cash provided by financing activities was \$9.8 million more than in 2010 primarily due to increased borrowings to finance our construction program. During 2011, we borrowed an additional \$38.0 million on our Revolving Credit Facility, we retired \$2.2 million of long-term debt, and we paid \$14.4 million of cash dividends on common stock.

Dividends

Dividends paid on our common stock totaled \$14.4 million for the three months ended March 31, 2011, or \$0.365 per share. On April 26, 2011, our Board of Directors declared an additional quarterly dividend of \$0.365 per share payable June 1, 2011, which is equivalent to an annual dividend rate of \$1.46 per share. The determination of the amount of future cash dividends, if any, to be declared and paid will depend upon, among other things, our financial condition, funds from operations, the level of our capital expenditures, restrictions under our credit facilities and our future business prospects.

Financing Transactions and Short-Term Liquidity

Our principal sources of short-term liquidity are our Revolving Credit Facility and cash provided by operations. In addition to availability under our Revolving Credit Facility described below, as of March 31, 2011, we had approximately \$44 million of cash unrestricted for operations.

Revolving Credit Facility

Our \$500 million Revolving Credit Facility can be used for the issuance of letters of credit, to fund working capital needs and for general corporate purposes. Borrowings are available under a base rate option or a Eurodollar option. The cost of borrowings or letters of credit is determined based upon our credit ratings. At current ratings levels, the margins for base rate borrowings, Eurodollar borrowings and letters of credit are 1.75%, 2.75% and 2.75%, respectively. The facility contains a commitment fee to be charged on the unused amount of the facility. Based upon current credit ratings, the fee is 0.5%. The facility contains an accordion feature which allows us, with the consent of the administrative agent, to increase the capacity of the facility to \$600 million.

Our consolidated net worth was \$1.1 billion at March 31, 2011, which was approximately \$240 million in excess of the net worth we are required to maintain under the credit facility. At March 31, 2011, our long-term debt ratio was 51.6%, our total debt leverage ratio (long-term debt and short-term debt) was 57.0%, and our recourse leverage ratio was approximately 57.8%. At March 31, 2011, we had borrowings of \$187 million and letters of credit outstanding of \$51 million on our Revolving Credit Facility. Available capacity remaining on our Revolving Credit Facility was approximately \$262 million at March 31, 2011.

The Revolving Credit Facility contains customary affirmative and negative covenants, such as limitations on the creation of new indebtedness and on certain liens, restrictions on certain transactions, and maintenance of certain financial covenants: including a minimum consolidated net worth and a recourse leverage ratio not to exceed 0.65 to 1.00.

In addition to covenant violations, an event of default under the credit facility may be triggered by other events, such as a failure to make payments when due or a failure to make payments when due in respect of, or a failure to perform obligations relating to, other debt obligations of \$35.0 million or more. Subject to applicable cure periods (none of which apply to a failure to timely pay indebtedness), an event of default would permit the lenders to restrict our ability to further access the credit facility for loans or new letters of credit, and could require both the immediate repayment of any principal and interest outstanding and the cash collateralization of outstanding letter of credit obligations.

Enserco Credit Facility

Enserco has a two-year, \$250 million committed credit facility expiring in May 2012. The facility includes a \$100 million accordion feature which allows us, with the consent of the administrative agent, to increase commitments under the facility. Maximum borrowings under the facility are subject to a sublimit of \$50.0 million. Borrowings under this facility are available under a base rate option or a Eurodollar option. Margins for base rate borrowings are 1.75% and for Eurodollar borrowings are 2.50%. Our covenants include tangible net worth, net working capital and realized net working capital requirements and, as of March 31, 2011, Enserco was in compliance with these covenants.

At March 31, 2011, \$147 million of letters of credit were issued under this facility and there were no cash borrowings outstanding.

Corporate Term Loan

In December 2010, we entered into a one-year \$100 million term loan (the "Loan") with J.P. Morgan and Union Bank due in December 2011. The cost of borrowing under the Loan was based on a spread of 137.5 basis points over LIBOR (1.69% at March 31, 2011). The covenants are substantially the same as those included in the Revolving Credit Facility and we were in compliance as of March 31, 2011.

Dividend Restrictions

Due to our holding company structure, substantially all of our operating cash flows are provided by dividends paid or distributions made by our subsidiaries. The cash to pay dividends to our shareholders is derived from these cash flows. As a result of certain statutory or regulatory limitations or financing agreements, our subsidiaries could have restrictions on the amount of distributions they can make to us.

Our utility subsidiaries are generally limited to the amount of dividends allowed by state regulatory authorities to be paid to us as a utility holding company and also may have further restrictions under the Federal Power Act. As of March 31, 2011, the restricted net assets at our Electric and Gas Utilities were approximately \$194 million compared to \$197 million at December 31, 2010.

Our Enserco Credit Facility is a borrowing base credit facility, the structure of which requires certain levels of tangible net worth and net working capital to be maintained for a given borrowing base election level. In order to maintain a borrowing base election level, Enserco may be restricted from making dividend payments to its parent company. Enserco's restricted net assets at March 31, 2011 were \$86 million compared to \$93 million at December 31, 2010.

As a covenant of the Black Hills Wyoming project financing, Black Hills Non-regulated Holdings has restricted assets of \$100 million. Black Hills Non-regulated Holdings is the parent of Black Hills Electric Generation which is the parent of Black Hills Wyoming.

Future Financing Plans

We have substantial capital expenditures in 2011, which are primarily due to the construction of additional utility and IPP generation to serve Colorado Electric. Our capital requirements are expected to be financed through a combination of operating cash flows, borrowings on our Revolving Credit Facility and long-term financings. We intend to settle the equity forward in the fourth quarter of 2011. We may complete an additional long-term senior unsecured debt financing at the holding company level in 2011. We intend to maintain a consolidated debt-to-capitalization level in the range of 50% to 55%; however, during the construction period of our new generation facilities in Colorado, we may exceed this level on a temporary basis.

Equity Forward

In November 2010, we entered into a Forward Agreement with J.P. Morgan in connection with a public offering of 4,000,000 shares of Black Hills Corporation common stock. Under the Forward Agreement on November 10, 2010, we agreed to issue to J.P. Morgan 4,000,000 shares of our common stock at an initial forward price of \$28.70875 per share. On December 7, 2010, the underwriters exercised the over-allotment option to purchase an additional 413,519 shares under the same terms as the original Forward Agreement (together with the Forward Agreement, the "Forward Agreements").

Based on the closing Black Hills Corporation common stock price of \$33.44 on March 31, 2011, and the forward price on that date for the equity forward of \$27.95 and over-allotment shares of \$27.95, the fair value net cash settlement of the 4,000,000 equity forward instrument and 413,519 over-allotment shares was approximately \$24 million. The Forward Agreements require a 60 day notice prior to settlement for cash or net share settlements. Forward prices and volume-weighted average market prices for the period between when notice is provided and settlement are used to calculate cash and net share settlement amounts.

At March 31, 2011, the equity forward instrument could have been settled with physical delivery of 4,413,519 shares to J.P. Morgan in exchange for cash of \$123 million. Assuming required notices were given and actions taken, the forward instruments could have also been net settled at March 31, 2011 with delivery of cash of approximately \$24 million or approximately 706,000 shares of common stock to J.P. Morgan. We may settle the equity forward instrument at any time up to the maturity date of November 10, 2011. We may also unilaterally elect to cash or net share settle at any date up to maturity, for all or a portion of the equity forward shares. It is our intent to settle the equity forward with the physical delivery of shares in the fourth quarter of 2011.

Hedges and Derivatives

Interest Rate Swaps

We have entered into floating-to-fixed interest rate swap agreements to reduce our exposure to interest rate fluctuations.

We have interest rate swaps with a notional amount of \$250 million that are not designated as hedge instruments. Accordingly, mark-to-market changes in value on these swaps are recorded within the income statement. For the three months ended March 31, 2011 and 2010 we recorded a \$5 million pre-tax unrealized mark-to-market non-cash gain and \$3 million pre-tax unrealized mark-to-market non-cash loss on the swaps, respectively. The mark-to-market value on these swaps was a liability of \$49 million at March 31, 2011. Subsequent mark-to-market adjustments could have a significant impact on our results of operations. A one basis point move in the interest rate curves over the term of the swaps would have a pre-tax impact of approximately \$0.3 million. These swaps hedge interest rate exposure for periods to 2018 and 2028 and have amended mandatory early termination dates ranging from December 15, 2011 to December 29, 2011. We have continued to maintain these swaps in anticipation of our upcoming financing needs, particularly as they relate to our planned capital requirements to build gas-fired power generation facilities to serve our Colorado Electric customers, and because of our upcoming holding company debt maturities, which are \$225 million and \$250 million in years 2013 and 2014, respectively. Alternatively, we may choose to cash settle these swaps at their fair value prior to their mandatory early termination dates, or unless these dates are extended, we will cash settle these swaps for an amount equal to their fair value on the termination dates.

In addition, we have \$150 million notional amount floating-to-fixed interest rate swaps, having a maximum remaining term of 5.75 years. These swaps have been designated as cash flow hedges and accordingly, their mark-to-market adjustments are recorded in Accumulated other comprehensive loss on the accompanying Condensed Consolidated Balance Sheets. The mark-to-market value of these swaps was a liability of \$20 million at March 31, 2011.

There have been no other material changes in our financing transactions and short-term liquidity from those reported in Item 7 of our 2010 Annual Report on Form 10-K filed with the SEC.

Energy Marketing Activities

Our energy marketing segment uses derivative instruments, including options, swaps, futures, forwards and other contractual commitments for both non-trading (hedging) and trading purposes. These activities can have liquidity impacts which the company monitors and manages in accordance with its Risk Management Policies and Procedures. The primary sources of liquidity for our energy marketing segment are: cash from operations, the stand-alone Enserco Credit Facility and advances of cash from the parent company.

In our energy marketing segment, our largest counterparties consist primarily of financial institutions and major energy companies. This concentration of counterparties may materially impact our exposure to credit risk resulting from market, economic or regulatory conditions. We seek to minimize credit risk through an evaluation of counterparty financial condition and credit ratings and collateral requirements under certain circumstances, including the use of master netting agreements. We continuously monitor collections and payments from our counterparties.

The addition of the coal, environmental, and power marketing businesses is not expected to result in a significant increase to the liquidity requirements of the marketing business in the near term.

Credit Ratings

Credit ratings impact our ability to obtain short- and long-term financing, the cost of such financing, and vendor payment terms, including collateral requirements. As of March 31, 2011, our senior unsecured credit ratings, as assessed by the three major credit rating agencies, were as follows:

Rating Agency	Rating	Outlook			
Fitch	BBB	Stable			
Moody's	Baa3	Stable			
S&P	BBB-	Stable			

In addition, as of March 31, 2011, Black Hills Power's first mortgage bonds were rated as follows:

Rating Agency	Rating	Outlook
Fitch	A-	Stable
Moody's	A3	Stable
S&P	BBB+	Stable

Capital Requirements

Actual and forecasted capital requirements for maintenance capital and development capital are as follows (in thousands):

	Expenditure	s for the		Total		
	Three Months End 2011	,	2011 Planned Expenditures			
Utilities:						
Electric Utilities ⁽¹⁾⁽²⁾	\$	45,396	\$	222,500		
Gas Utilities		6,141		65,200		
Non-regulated Energy:						
Oil and Gas ⁽³⁾		7,444		60,900		
Power Generation ⁽⁴⁾		40,606		91,700		
Coal Mining		3,196		12,500		
Energy Marketing		1,182		2,400		
Corporate		2,119		7,000		
Total	\$	106,084	\$	462,200		

(1) The 2011 total planned expenditures include capital requirements associated with our plans to build a 180 MW gas-fired power generation facility to serve our Colorado Electric customers. We spent \$35.8 million during the first three months of 2011. The total construction cost of the facility is expected to be approximately \$227 million and construction is expected to be completed by the end of 2011. The planned expenditures indicated for 2011 include optimizing accelerated depreciation for federal income tax purposes in the form of bonus depreciation, which was retroactively reinstated by Congress and signed into law by the President of the United States in September 2010.

- (2) 2011 planned expenditures include expected spending for planned wind projects for both Black Hills Power and Colorado Electric. Combined 2012 planned expenditures on these projects are expected to be approximately \$56.2 million and 2013 planned expenditures are expected to be approximately \$9.6 million.
- (3) Oil and Gas planned expenditures have increased \$12.0 million from our prior forecast disclosed in our Form 10-K, primarily due to development in the Bakken formation and our Mancos test program.
- (4) Our Power Generation segment was awarded the bid to provide 200 MW of generation capacity for a 20-year period to Colorado Electric. We spent \$40.5 million during the first three months of 2011. The total construction cost of the new facility is expected to be approximately \$260 million, and construction is expected to be completed by the end of 2011.

We continually evaluate all of our forecasted capital expenditures, and if determined prudent, we may defer some of these expenditures for a period of time. Future projects are dependent upon the availability of attractive economic opportunities, and as a result, actual expenditures may vary significantly from forecasted estimates.

Contractual Obligations

Unconditional purchase obligations for firm transportation and storage fees for our Energy Marketing segment increased \$5.9 million from \$83.5 million at December 31, 2010 to \$89.4 million at March 31, 2011. Approximately \$56.1 million of the firm transportation and storage fee obligations relate to the 2011-2013 period with the remaining occurring thereafter.

Construction of a 180 MW power generation facility by our Colorado Electric utility and 200 MW power generation facility by our Power Generation segment is progressing. Cost of construction is expected to be approximately \$227 million for Colorado Electric and approximately \$260 million for the Power Generation segment. Construction is expected to be completed at both facilities by December 31, 2011. As of March 31, 2011, committed contracts for equipment purchases and for construction were 100% and 89% complete, respectively, for the Colorado Electric utility and 100% and 77% complete, respectively, for the Power Generation segment.

Guarantees

Except as noted below, there have been no new guarantees provided from those previously disclosed in Note 20 of our Notes to the Consolidated Financial Statements in our 2010 Annual Report on Form 10-K.

The guarantee for up to \$7.0 million of the obligations of Enserco under an agency agreement expired in the first quarter of 2011.

The construction of the office building in Papillion, Nebraska was completed and the guarantee for \$6.0 million was terminated upon purchase of the building in April 2011.

New Accounting Pronouncements

Other than the new pronouncements reported in our 2010 Annual Report on Form 10-K filed with the SEC and those discussed in Note 2 of the Notes to Condensed Consolidated Financial Statements in this Quarterly Report on Form 10-Q, there have been no new accounting pronouncements that are expected to have a material effect on our financial statements.

FORWARD-LOOKING INFORMATION

This report contains forward-looking information. All statements, other than statements of historical fact, included in this report that address activities, events, or developments that we expect, believe or anticipate will or may occur in the future are forward-looking statements. These forward-looking statements are based on assumptions which we believe are reasonable based on current expectations and projections about future events and industry conditions and trends affecting our business. Forward-looking information involves risks and uncertainties, and certain important factors can cause actual results to differ materially from those anticipated. In some cases, forward-looking statements can be identified by terminology such as "may," "will, "could," "should," "expects," "plans," anticipates," "believes," "estimates," "projects," "predicts," "potential," or "continue" or the negative of these terms or other similar terminology. There are various factors that could cause actual results to vary significantly from those suggested by the forward-looking statements; accordingly, there can be no assurance that such indicated results will be realized. The factors which may cause our results to vary significantly from our forward-looking statements include the risk factors described in Item 1A. of our 2010 Annual Report on Form 10-K, Part II, and Item 1A of this quarterly report on Form 10-Q, and other reports that we file with the SEC from time to time, and the following:

- We continually evaluate financing options including senior notes, first mortgage bonds, term loans and project financing. Some important factors that could cause actual results to differ materially from those anticipated include:
 - Our ability to access capital markets depends on market conditions beyond our control. If the capital markets deteriorate, we may not be able to permanently refinance some short-term debt and fund our power generation projects on reasonable terms, if at all.
 - Our ability to raise capital in the debt capital markets depends upon our financial condition and credit ratings, among other things. If our financial condition deteriorates unexpectedly, or
 our credit ratings are lowered, we may not be able to refinance some short-term debt and fund our power generation projects on reasonable terms, if at all.
 - We anticipate that our existing credit capacity and available cash will be sufficient to fund our working capital needs and our maintenance capital requirements. Some important factors that could cause actual results to differ materially from those anticipated include:
 - Our access to revolving credit capacity depends on maintaining compliance with loan covenants. If we violate these covenants, we may lose revolving credit capacity and not have
 sufficient cash available for our peak winter needs and other working capital requirements, and our forecasted capital expenditure requirements.
 - Counterparties may default on their obligations to supply commodities, return collateral to us, or otherwise meet their obligations under commercial contracts, including those designed to
 hedge against movements in commodity prices.
 - We expect to fund a portion of our capital requirements for the planned regulated and non-regulated generation additions to supply our Colorado Electric subsidiary through a combination of long-term debt and issuance of equity.

- We expect contributions to our defined benefit pension plans to be approximately \$0.6 million and \$13.4 million for the remainder of 2011 and for 2012, respectively. Some important factors that could cause actual contributions to differ materially from anticipated amounts include:
 - The actual value of the plans' invested assets.
 - The discount rate used in determining the funding requirement.
 - The outcome of pending labor negotiations relating to benefit participation of our collective bargaining agreements.
- We expect the goodwill related to our utility assets to fairly reflect the long-term value of stable, long-lived utility assets. Some important factors that could cause us to revisit the fair value of this goodwill include:
 - A significant and sustained deterioration of the market value of our common stock.
 - Negative regulatory orders, condemnation proceedings or other events that materially impact our Utilities' ability to generate sufficient stable cash flow over an extended period of time.
- We expect to make approximately \$462.2 million of capital expenditures in 2011. Some important factors that could cause actual expenditures to differ materially from those anticipated include:
 - The timing of planned generation, transmission or distribution projects for our Utilities is influenced by state and federal regulatory authorities and third parties. The occurrence of events
 that impact (favorably or unfavorably) our ability to make planned or unplanned capital expenditures could cause our forecasted capital expenditures to change.
 - Forecasted capital expenditures associated with our Oil and Gas segment are driven, in part, by current market prices. Changes in crude oil and natural gas prices may cause us to change our planned capital expenditures related to our crude oil and gas operations.
 - Our ability to complete the planning, permitting, construction, start-up and operation of power generation facilities in a cost-efficient and timely manner.
- The timing, volatility, and extent of changes in energy and commodity prices, supply or volume, the cost and availability of transportation of commodities, changes in interest or foreign exchange rates, and the demand for our services, any of which can affect our earnings, our financial liquidity and the underlying value of our assets including the possibility that we may be required to take future impairment charges under the SEC's full cost ceiling test for natural gas and oil reserves.
- Federal and state laws concerning climate change and air emissions, including emission reduction mandates, carbon emissions and renewable energy portfolio standards, may materially increase our generation and production costs and could render some of our generating units uneconomical to operate and maintain or which could mandate or require closure of one or more of our generating units.
- The effect of Dodd-Frank and the regulations to be adopted thereunder on our use of oil and natural gas derivative instruments in connection with our energy marketing activities and to hedge our expected production of crude oil and natural gas and on our use of interest rate derivative instruments.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Utilities

We produce, purchase and distribute power in four states and purchase and distribute natural gas in five states. All of our gas distribution utilities have PGA provisions that allow them to pass the prudently-incurred cost of gas through to the customer. To the extent that gas prices are higher or lower than amounts in our current billing rates, adjustments are made on a periodic basis to true-up billed amounts to match the actual natural gas cost we incurred. These adjustments are subject to periodic prudence reviews by the state utility commissions. We have a mechanism in South Dakota, Colorado, Wyoming and Montana for our electric utilities that serves a purpose similar to the PGAs for our gas utilities. To the extent that our fuel and purchased power energy costs are higher or lower than the energy cost built into our tariffs, the difference (or a portion thereof) is passed through to the customer.

As allowed or required by state utility commissions, we have entered into certain exchange-traded natural gas futures, options and basis swaps to reduce our customers' underlying exposure to volatility of natural gas prices. These transactions are considered derivatives and are marked-to-market. Gains or losses, as well as option premiums on these transactions, are recorded in Regulatory assets or Regulatory liabilities.

The fair value of our Utilities derivative contracts are summarized below (in thousands):

	As of		As of	As of
	 March 31, 2011		cember 31, 2010	March 31, 2010
Net derivative (liabilities) assets	\$ (2,455)	\$	(7,188)	(6,475)
Cash collateral	3,720		10,355	8,094
	\$ 1,265	\$	3,167	1,619

Non Regulated Trading Activities

The following table provides a reconciliation of Energy Marketing activity in our marketing portfolio that has been recorded at fair value including market value adjustments on inventory positions that have been designated as part of a fair value hedge during the three months ended March 31, 2011 (in thousands):

Total fair value of energy marketing positions marked-to-market at December 31, 2010	\$ 23,418 _(a)
Net cash settled during the period on positions that existed at December 31, 2010	(6,585)
Unrealized gain (loss) on new positions entered during the period and still existing at March 31, 2011	15,530
Realized (gain) loss on positions that existed at December 31, 2010 and were settled during the period	2,083
Change in cash collateral	(974)
Unrealized gain (loss) on positions that existed at December 31, 2010 and still exist at March 31, 2011	(18,654)
Total fair value of energy marketing positions at March 31, 2011	\$ 14,818 _(a)

(a) The fair value of energy marketing positions consists of derivative assets/liabilities held at fair value in accordance with accounting standards for fair value measurements and market value adjustments to natural gas inventory that has been designated as a hedged item as part of a fair value hedge in accordance with accounting standards for derivatives and hedges, as follows (in thousands):

	As of	As of	As of	As of	As of
	 March 31, 2011	 December 31, 2010	 September 30, 2010	 June 30, 2010	 March 31, 2010
Net derivative assets	\$ 11,518	\$ 28,524	\$ 51,734	\$ 31,720	\$ 25,634
Cash collateral	2,984	3,958	(7,365)	_	171
Market adjustment recorded in material, supplies and fuel	316	(9,064)	(18,716)	(8,469)	(11,039)
Total fair value of energy marketing positions marked-to-market	\$ 14,818	\$ 23,418	\$ 25,653	\$ 23,251	\$ 14,766

To value the assets and liabilities for our outstanding derivative contracts, we use the fair value methodology outlined in accounting standards for fair value measurements and disclosures. See Note 3 of the Notes to Consolidated Financial Statements in our 2010 Annual Report on Form 10-K and Note 12 and Note 13 of the accompanying Notes to Condensed Consolidated Financial Statements in this Quarterly Report on Form 10-Q.

The sources of fair value measurements were as follows (in thousands):

			Maturities	
Source of Fair Value of Energy Marketing Positions	Less	than 1 year	1 - 2 years	Total Fair Value
Cash collateral	\$	2,984	\$ _	\$ 2,984
Level 1		_	—	—
Level 2		5,790	1,423	7,213
Level 3		1,664	2,641	4,305
Market value adjustment for inventory (see footnote (a) above)		316	—	316
Total fair value of our energy marketing positions	\$	10,754	\$ 4,064	\$ 14,818

GAAP restricts mark-to-market accounting treatment primarily to only those contracts that meet the definition of a derivative under accounting for derivatives and hedging. Therefore, the above reconciliation does not present a complete picture of our overall portfolio of trading activities or our expected cash flows from energy trading activities. In our marketing operations, we often employ strategies that include utilizing derivative contracts along with inventory, storage and transportation positions to accomplish the objectives of our producer services, end-use origination and wholesale marketing groups. Except in circumstances when we are able to designate transportation, storage or inventory positions as part of a fair value hedge, accounting storadeds for derivatives generally do not allow us to mark our inventory, transportation or storage positions to market. The result is that while a significant majority of our energy marketing positions are fully economically hedged, we are required to mark some parts of our overall strategies (the derivatives) to market value, but are generally precluded from marking the rest of our economic hedges (transportation, inventory or storage) to market. Volatility in reported earnings and derivative positions should be expected given these accounting requirements. The table below references non-GAAP measures that quantify these positions.

The following table presents a reconciliation of our March 31, 2011 energy marketing positions recorded at fair value under GAAP to a non-GAAP measure of the fair value of our energy marketing forward book wherein all forward trading positions are marked-to-market (in thousands):

Fair value of our energy marketing positions marked-to-market in accordance with GAAP (see footnote (a) above)	\$ 14,818
Market value adjustments for inventory, storage and transportation positions that are part of our forward trading book, but that are not marked-to-market under GAAP	(27,530)
Fair value of all forward positions (non-GAAP)	(12,712)
Cash collateral included in GAAP marked-to-market fair value	(2,984)
Fair value of all forward positions excluding cash collateral (non-GAAP) *	\$ (15,696)

* We consider this measure a Non-GAAP financial measure. This measure is presented because we believe it provides a more comprehensive view to our investors of our energy trading activities and thus a better understanding of these activities than would be presented by a GAAP measure alone.

Except as discussed above, there have been no material changes in market risk from those reported in our 2010 Annual Report on Form 10-K filed with the SEC. For more information on market risk, see Part II, Items 7 and 7A. in our 2010 Annual Report on Form 10-K, and Note 12 of the Notes to our Condensed Consolidated Financial Statements in this Quarterly Report on Form 10-Q.

Activities Other Than Trading

We have entered into agreements to hedge a portion of our estimated 2011, 2012 and 2013 natural gas and crude oil production from the Oil and Gas segment. The hedge agreements in place are as follows:

Natural Gas

		Hedge Type	Term	Volume	Price
				(MMBtu/day)	
San Juan El Paso	6/2/2009	Swap	04/11 - 06/11	5,000	\$ 5.99

ITEM 4. CONTROLS AND PROCEDURES

Our Chief Executive Officer and Chief Financial Officer evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934) as of March 31, 2011. Based on their evaluation, they have concluded that our disclosure controls and procedures are effective.

There have been no changes in our internal control over financial reporting that occurred during the quarter ended March 31, 2011 that have materially affected or are reasonably likely to materially affect our internal control over financial reporting.

BLACK HILLS CORPORATION

Part II — Other Information

ITEM 1. Legal Proceedings

For information regarding legal proceedings, see Note 19 in Item 8 of our 2010 Annual Report on Form 10-K and Note 15 in Item 1 of Part I of this Quarterly Report on Form 10-Q, which information from Note 15 is incorporated by reference into this item.

ITEM 1A. Risk Factors

There are no material changes to the Risk Factors previously disclosed in Item 1A of Part I in our Annual Report on Form 10-K for the year ended December 31, 2010.

ITEM 2. Unregistered Sales of Equity Securities and Use of Proceeds

Issuer Purchases of Equity Securities

ITEM 5. Other Information

Mine Safety and Health Administration Safety Data

Safety is a core value at Black Hills Corporation and at each of its subsidiary operations. We have in place a comprehensive safety program that includes extensive health and safety training for all employees, site inspections, emergency response preparedness, crisis communications training, incident investigation, regulatory compliance training and process auditing, as well as an open dialog between all levels of employees. The goals of our processes are to eliminate exposure to hazards in the workplace, ensure that we comply with all mine safety regulations, and support regulatory and industry efforts to improve the health and safety of our employees along with the industry as a whole.

Under the recently enacted Dodd-Frank Act, each operator of a coal or other mine is required to include certain mine safety results in its periodic reports filed with the SEC. Our mining operations, consisting of our Wyodak Coal Mine, are subject to regulation by MSHA under the Federal Mine Safety and Health Act of 1977 (the "Mine Act"). Below we present certain mining safety and health matters, for the three-month period ended March 31, 2011. In evaluating this information, consideration should be given to factors such as: (i) the number of citations and orders will vary depending on the size of the coal mine, (ii) the number of citations issued will vary from inspector to inspector and mine to mine, and (iii) citations and orders can be contested and appealed, and in that process, are often reduced in severity and amount, and are sometimes dismissed. The information presented includes:

- Total number of violations of mandatory health and safety standards that could significantly and substantially contribute to the cause and effect of a coal or other mine safety or health hazard under section 104 of the Mine Act for which we have received a citation from MSHA;
- Total number of orders issued under section 104(b) of the Mine Act;
- Total number of citations and orders for unwarrantable failure of the mine operator to comply with mandatory health and safety standards under section 104(d) of the Mine Act;
- Total number of imminent danger orders issued under section 107(a) of the Mine Act; and
- Total dollar value of proposed assessments from MSHA under the Mine Act.

During the three months ended March 31, 2011, WRDC (i) was not assessed any Mine Act section 110(b)(2) penalties for failure to correct the subject matter of a Mine Act section 104(a) citation within the specified time period, which failure was deemed flagrant (i.e., a reckless or repeated failure to make reasonable efforts to eliminate a known violation that substantially and proximately caused, or reasonably could have been expected to cause, death or serious bodily injury); (ii) did not receive any Mine Act section 107(a) imminent danger orders to immediately remove miners; or (iii) did not receive any MSHA written notices under Mine Act section 104(e) of a pattern of violation of mandatory health or safety standards or of the potential to have such a pattern. In addition, there were no fatalities at the mine during the three months ended March 31, 2011.

The table below sets forth the total number of section 104 citations and/or orders issued by MSHA to WRDC under the indicated provisions of the Mine Act, together with the total dollar value of proposed MSHA assessments, received during the three months ended March 31, 2011 and legal actions pending before the Federal Mine Safety and Health Review Commission, together with the Administrative Law Judges thereof, for our mining complex. All citations were abated within 24 hours of issue.

Mine Act Section 104 Significant and Substantial Citations	Mine Act Section 104(b) Orders	Mine Act Section 104(d) Citations and Orders	Mine Act Section 107(a) Imminent Danger Orders	Total Dollar Value of Proposed MSHA Assessments (in dollars)	Number of Legal Actions Pending Before the Federal Mining Safety and Health Review Commission

CERTIFICATION

I, David R. Emery, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of Black Hills Corporation;

- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.
- 5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

CERTIFICATION

I, Anthony S. Cleberg, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of Black Hills Corporation;

- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.
- 5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
